FLAGSHIP COURSE

AI Security — Simplified

The 2-day course this entire program is built around.

DATES

October 20–21, 2026

TIME

9:00 AM – 5:00 PM daily

VENUE

The Dylan Hotel, Dublin

INVESTMENT

€1,395

FORMAT

2 days · in-person · capped at 18 seats

AUDIENCE

Technical, privacy & AI governance teams

What You'll Walk Away With

- Practical defenses against prompt injection, jailbreaking, data poisoning, model theft, and RAG / supply-chain attacks
- A working map of your AI risk to the OWASP LLM Top 10, MITRE ATLAS, and NIST AI RMF frameworks
- The ability to ask any AI vendor, or any engineering team, the questions that actually matter

30 years IT & security · 10+ years AI security · AIGP Consultant · Former FBI data security trainer

COURSE AGENDA

14 Modules Across Two Days

Every module pairs the attack with the defense — not just theory.

DAY 1 — 9AM–5PM

- 1 AI Fundamentals & Threat Landscape
- 2 Adversarial Machine Learning
- 3 Data & Model Poisoning
- 4 Prompt Injection (OWASP #1 LLM risk)
- 5 Model Extraction & Theft
- 6 Supply Chain Risk
- 7 Agentic AI & Excessive Agency

DAY 2 — 9AM–5PM

- 8 Deepfakes & Synthetic Media
- 9 AI-Powered Social Engineering
- 10 Privacy & Sensitive Info Disclosure
- 11 EU AI Act — What Security Teams Need to Know
- 12 Vendor & Third-Party AI Risk
- 13 Incident Response for AI Systems
- 14 Building an AI Security Program — capstone tabletop exercise

OWASP LLM Top 10

MITRE ATLAS

NIST AI RMF

EU AI Act

This is the most important class you can take this year, as a manager, IT Engineer, or C-Suite executive, to secure your company and boost your CV.

BEYOND THE FLAGSHIP

Upcoming Classes

The full 2026–2027 training lineup.

AIGP Certification Class

2 days · 9:00 AM–5:00 PM · In-person

Audience: C-suite, senior managers, IT & privacy staff

- Full IAPP AIGP body-of-knowledge coverage, taught by an AIGP-credentialed practitioner
- Real-time Q&A on EU AI Act obligations as they apply to your organization
- Certificate of completion and exam voucher included

AI Data Security for the C-Suite

1 day · Executive briefing · In-person or on-site

Audience: CEOs, boards, CISOs, department heads

- What “AI data security” means for your business, in plain, board-ready language
- The vendor questions almost no one is asking about how AI tools handle company data
- Leave with a one-page AI data risk framework for your next board meeting

AI Data Security Fundamentals

2 days · In-person

Audience: IT & security teams new to AI-specific data risk

- How data actually moves through an AI system — training, inference, memory, logs
- Spotting sensitive data exposure in prompts, outputs, and third-party AI tools
- Practical data classification and DLP approaches built for AI, not bolted on

Upcoming Classes, Continued

Deeper technical and governance tracks for the AI data security niche.

Securing the AI Data Pipeline

2 days · Technical, hands-on

Audience: Engineers, architects, ML/AI teams

- Protecting ingestion, embeddings, and vector databases in RAG systems
- Fine-tuning data protection, provenance, and lineage tracking
- Encryption and access control at every stage of the pipeline

AI Data Governance & Regulatory Compliance

2 days · In-person

Audience: Privacy, legal, compliance & governance teams

- Where the EU AI Act and GDPR intersect on AI training and inference data
- Data minimization, retention, and cross-border transfer for AI systems
- Building the audit trail regulators actually expect to see

AI Vendor & Third-Party Data Risk

1 day · In-person or on-site

Audience: Procurement, security & vendor-risk teams

- The right questions to ask any AI vendor before you sign
- Finding “shadow AI” already running inside your organization
- A practical framework for ongoing third-party AI data risk review

Private / on-site delivery available worldwide — every course is built to travel.
